

LAKE COUNTY OFFICE OF EDUCATION  
Office of the Superintendent

**Youth Suicide Prevention Policy**

**ISSUE**

Assembly Bill 2246 requires each governing board that serves students in grades seven to twelve to adopt a Youth Suicide Prevention Policy.

**BACKGROUND/PREVIOUS BOARD ACTIVITY**

LCOE does not currently have a suicide prevention policy.

**DISCUSSION**

Suicide is the second leading cause of death for youth ages fifteen to twenty-four. Students in earlier grades are also known to consider, attempt, and die by suicide—which is also a leading cause of death among ten to twelve-year-olds. Research demonstrates that suicidal ideation may start as early as preschool (however, suicide deaths are very rare among children nine years of age and younger).

**FISCAL, STAFFING, AND FACILITIES**

The Commission on State Mandates determined that this bill contains costs mandated by the state. Reimbursement to LEAs will be made pursuant to Part 7 of Division 4 of Title 2 of the Government Code.

**SUPERINTENDENT'S RECOMMENDATION**

This item is for first reading.

Report prepared by: April Leiferman, Assistant Superintendent

# **LCOE Board Policy**

## **Suicide Prevention**

BP 5141.52

### **Students**

The Lake County Superintendent of Schools and County Board of Education recognize that suicide is a leading cause of death among youth and that school personnel who regularly interact with students are often in a position to recognize the warning signs of suicide and to offer appropriate referral and/or assistance. To attempt to reduce suicidal behavior and its impact on students and families, the Superintendent or designee shall develop measures and strategies for suicide prevention, intervention, and postvention.

In developing measures and strategies for Lake County Office of Education, hereafter referred to as LCOE, the Superintendent or designee may consult with school health professionals, school counselors, school psychologists, school social workers, administrators, other staff, parents/guardians, students, local health agencies, mental health professionals, and community organizations.

Such measures and strategies shall include, but are not limited to:

1. Staff development on suicide awareness and prevention for teachers, school counselors, and other district employees who interact with students in grades 7 to 12, but training may extend before grade 7
2. Instruction to students in problem-solving and coping skills to promote students' mental, emotional, and social health and well-being, as well as instruction in recognizing and appropriately responding to warning signs of suicidal intent in others
3. Methods for promoting a positive school climate that enhances students' feelings of connectedness with the school and that is characterized by caring staff and harmonious interrelationships among students
4. The provision of information to parents/guardians regarding risk factors and warning signs of suicide, the impact of the youth suicide problem, LCOE's suicide prevention (curriculum or policy), basic steps for helping suicidal youth, and/or LCOE and community resources that can help youth in crisis
5. Encouragement for students to notify appropriate school personnel or other adults when they are experiencing thoughts of suicide or when they suspect or have knowledge of another student's suicidal intentions
6. Crisis intervention procedures for addressing suicide threats or attempts

7. Assessing for counseling and other postvention strategies for helping students, staff, and others cope in the aftermath of a student's suicide

### **Students**

#### **Staff Development**

Lake County Office of Education, hereafter referred to as LCOE, shall provide suicide prevention training to teachers, counselors, and other district employees who interact with students inclusive in grades 7 to 12, but may extend before grade 7 and beyond grade 12. The training shall be offered under the direction of LCOE personnel and/or in cooperation with one or more community mental health agencies.

Materials for training shall include how to identify appropriate mental health services at the school site and within the community, and when and how to refer youth and their families to those services. Suicide prevention materials also may include programs that can be completed through self-review.

Staff development shall include research and information related to the following topics:

1. The higher risk of suicide among certain student populations, including, but not limited to living with mental illness, substance use disorders, engaged in self-harm or have attempted suicide, live in out-of-home settings, experiencing homelessness, bereaved by suicide, have chronic illness or disability, American Indian/Alaska Native, or students who are lesbian, gay, bisexual, transgender, or questioning
2. Individual risk factors, such as, previous suicide attempt(s) or self-harm, history of depression or mental illness, family history of suicide, instability, or violence, feelings of isolation, interpersonal conflicts, a recent severe stressor or loss, intense unstable relationships, impulsivity, substance abuse, and other factors
3. Warning signs that may indicate depression, emotional distress, or suicidal intentions, such as, changes in students' personality or behavior and verbalizations of hopelessness or suicidal intent
4. Protective factors that may help to decrease a person's suicide risk, such as resiliency, problem-solving ability, access to mental health care, and positive connections to family, peers, school, and community
5. Instructional strategies for teaching suicide prevention and promoting mental and emotional health

6. When and how to provide school and community resources and mental health services, including resources and services that meet the specific needs of high-risk groups
7. District procedures for screening and intervening when a student attempts, threatens, or discloses the desire to die by suicide

### **Instruction**

The district's comprehensive health education program shall promote the healthy mental, emotional, and social development of students and shall be aligned with the state content standards and curriculum framework. Suicide prevention instruction shall be incorporated into the health education curriculum at appropriate secondary grades and shall be designed to help students:

1. Identify and analyze signs of depression and self-destructive behaviors and understand how feelings of depression, loss, isolation, inadequacy, and anxiety can lead to thoughts of suicide
2. Develop coping and resiliency skills and self-esteem
3. Learn to listen, be honest, share feelings, and get help when communicating with friends who show signs of suicidal intent
4. Identify trusted adults, school resources, and/or community crisis intervention resources where youth can get help and recognize that there is no stigma associated with seeking services for mental health, substance abuse, and/or suicide prevention

### **Intervention**

Intervention toward suicide prevention shall include, but limited too:

1. Students shall be encouraged to notify a teacher, principal, counselor, or other adult when they are experiencing thoughts of suicide or when they suspect or have knowledge of another student's suicidal intentions.
2. Methods for promoting a positive school climate that enhances students' feelings of connectedness with the school and that is characterized by caring staff and harmonious interrelationships among students
3. The provision of information to parents/guardians regarding risk factors and warning signs of suicide, the impact of the youth suicide problem, the district's suicide prevention policy, basic steps for helping suicidal youth, and/or school and community resources that can help youth in crisis

4. Crisis intervention procedures for addressing suicide threats or attempts
5. Encouragement for students to notify appropriate school personnel or other adults when they are experiencing thoughts of suicide or when they suspect or have knowledge of another student's suicidal intentions

Every statement regarding suicidal intent shall be taken seriously. Whenever a staff member suspects or has knowledge of a student's suicidal intentions based on the student's verbalizations or act of self-harm, he/she shall promptly notify the principal or school counselor.

Although any personal information that a student discloses to a school counselor shall generally not be revealed, released, referenced, or discussed with third parties, the counselor shall report to the principal and student's parents/guardians when he/she has reasonable cause to believe that disclosure is necessary to avert a clear and present danger to the health, safety, or welfare of the student. In addition, the counselor may disclose information of a personal nature to psychotherapists, other health care providers, or the school nurse for the sole purpose of referring the student for mental health services and/or treatment.

A school employee shall act only within the authorization and scope of his/her credential or license. An employee is not authorized to diagnose or treat mental illness unless he/she is specifically licensed and employed to diagnose or treat mental illness.

When a suicide attempt or threat is reported, the principal or designee shall ensure student safety by taking the following actions:

1. Immediately securing medical treatment and/or mental health services as necessary
2. Notifying law enforcement and/or other emergency assistance if a suicidal act is being actively threatened
3. Keeping the student under continuous adult supervision until the parent/guardian and/or appropriate support agent or agency can be contacted and intervenes to take over physical care and supervision
4. Removing other students from the immediate area as soon as possible

The principal or designee shall document the incident in writing, including the steps that the school took in response to the suicide attempt or threat.

The Superintendent or designee shall follow up with the parent/guardian and student in a timely manner to provide referrals to appropriate services as needed. If the parent/guardian does not access treatment for the student, the Superintendent or designee may meet with the parent/guardian to identify barriers to treatment and assist the family in providing follow-up care

for the student. If follow-up care is still not provided, the Superintendent or designee shall consider whether he/she is required, pursuant to laws for mandated reporters of child neglect, to refer the matter to the local child protective services agency.

For any student returning to school after a mental health crisis, the principal or designee and/or school counselor may meet with the parents/guardians and, if appropriate, with the student to discuss re-entry and appropriate next steps to safely ensure the student's readiness for return to school. LCOE may require a physician's release to return to school.

## **Postvention**

In the event that a student dies by suicide, the Superintendent or designee shall communicate with the student's parents/guardians to offer condolences, assistance, and resources. In accordance with the laws governing confidentiality of student record information, the Superintendent or designee shall consult with the parents/guardians regarding facts that may be divulged to other students, parents/guardians, and staff.

The Superintendent or designee shall implement procedures to address the grief of students and staff and to minimize the risk of imitative suicide or suicide contagion. He/she shall provide students, parents/guardians, and staff with information on support services, counseling, and/or referrals to community agencies as needed. School staff may receive assistance from school counselors or other mental health professionals in determining how best to discuss the suicide or attempted suicide with students.

Any response to media inquiries shall be handled by the district-designated spokesperson who shall not divulge confidential information. The district's response shall not sensationalize death by suicide and shall focus on the district's postvention plan and available resources.

After any suicide or attempted suicide by a student, the Superintendent or designee shall provide an opportunity for all staff who responded to the incident to debrief.
