RE: Reopening Guidelines for 2020-21

.....

The COVID-19 situation continues to remain fluid, and multiple federal and state agencies continue to update their guidance. Guidance provided on June 25, 2020 is no longer aligned with current California Department of Public Health (CDPH) guidance.

In an effort to quickly respond to these frequently changing guidelines, the Lake County Public Health Office will align their guidelines with the California Department of Public Health, and the Center for Disease Control and Prevention. Please refer to the following resources in making decisions for opening schools for the 2020-21 school year.

- California Department of Public Health Industry Guidance: [Schools and School-Based Program](#)
- Center for Disease Control and Prevention – [Preparing K-12 Administrators for a Safe Return to School in Fall 2020](#)

Please remember, each school will be required to complete a [School Site-Specific Protection Plan](#) before students or staff return to campus.

I appreciate your patience during this extraordinary time.
